

AGENTIC CODING / 2026

# Agents at work.

---

*Agentic coding and building agents to automate real workflows.*

## A G E N D A

- 01     How we got here.**
- 02     Why agents now.**
- 03     What an agent is.**
- 04     OpenClaw, in your pocket.**
- 05     How to build one.**

# How

*did software start writing itself?*

2010s

# Stack Overflow.

*Humans copy snippets between tabs.*

2 0 2 1

# Autocomplete learns to code.

*Copilot ships. The IDE starts to predict.*

2022 - 2023

**Copy.  
Paste.  
Pray.**

*ChatGPT writes the snippet. The human is the runtime.*

2023 - 2024

# Chat with your repo.

*LLMs read code, explain it, refactor it.*

2025 - TODAY

**It writes,  
runs, ships.**

*Agents take goals, not keystrokes.*

# Why

*does any of this matter?*

# 70%

of knowledge work is repeatable.

*Tickets, reports, reviews, follow-ups, glue code.*

# 10x

less typing. Same output.

*You describe the goal. The agent does the keystrokes.*

# 0

context switches.

*Work stays in one place. The agent goes to the tools.*

# What

*is an agent, actually?*

**An agent  
plans. acts. checks.  
retries.**

*A loop with judgment, not just a prompt.*

## THE LOOP

# GOAL

What you want

# TOOLS

How it acts

# CHECK

Did it work

*Then it loops until done.*

THE SHIFT

SCRIPT

**Step. Step. Step.**

*Breaks the moment reality drifts.*

AGENT

**Goal. Decide. Verify.**

*Adapts when the world changes.*

*Brittle becomes resilient.*

WORKFLOWS TO AUTOMATE

**Code. Ops.**

**Research. Reports.**

## THE TOOLBOX

**Claude Code**

**Superpowers**

**OpenClaw**

**gstack**

**Agents SDK**

**LangGraph**

**MCP**

*Pick one. The shape is the same.*

## THE TOOLBOX

**Claude Code**

**Superpowers**

**OpenClaw**

**gstack**

**Agents SDK**

**MCP**

*Pick one. The shape is the same.*

# **A plugin of skills. of habits. of taste.**

*Drop-in expertise the agent already knows how to use.*

**You have skills.  
Search them.  
Use them.**

*A startup rule injected at boot. The bootstrap that kicks it off.*

**TDD.**

**Debug.**

**Brainstorm.**

**Plan.**

**Worktrees.**

**Review.**

*Reusable SKILL.md files. Drop-in expertise.*

**Brainstorm.**

**Plan.**

**Worktree.**

**Test. Code. Review.**

**Ship.**

*The agent does not code first. It clarifies, plans, isolates, tests, reviews, finishes.*

**RED**

**GREEN**

**REFACTOR**

*Failing test first*

*Minimal code to pass*

*Clean. Then commit.*

*Write the failure. Watch it fail. Then make it pass.*

# An agent in your terminal.

*Reads your code. Edits files. Runs commands. Ships PRs.*

**Read.**

**Edit.**

**Run.**

**Recall.**

*Files. Diffs. Shell. Memory. The agent's hands.*

**Bring your skills.**  
**Bring your tools.**  
**Bring your team.**

*Plugins, MCPs, subagents, hooks. The shape bends to you.*

THE PRIMITIVES

**Skills.**

**Subagents.**

**Slash commands.**

**Hooks.**

# **A skill is a folder. of know- how(instructions).**

*A SKILL.md the agent reads before doing the job.*

**Spawn a helper.  
Hand it a task.  
Get a report.**

*Parallel work. Fresh context. Less noise in the main thread.*

**/review.**

**/plan.**

**/ship.**

*Frozen prompts. One keystroke. Reusable workflows.*

*PRE-HOOKS*

*POST-HOOKS*

**BEFORE** → **DURING** → **AFTER**

*Gate the action*

*Watch it run*

*React to it*

*Scripts that run on the agent's lifecycle. Guardrails, telemetry, glue.*

P R O J E C T S

# PROJECTS

P R O J E C T S

# DEMO

# OpenClaw

*an agent in your pocket.*

# A personal agent you run yourself.

*MIT-licensed. Local-first. Markdown memory on disk.*

**WhatsApp. Telegram.**

**Slack. iMessage.**

*The channel you already use becomes the command line.*

**01 Morning brief.**

*bills, calendar, mail*

**02 Triage your messages.**

*WhatsApp, Slack*

**03 Drive a browser.**

*log in, download*

**04 Run the shell.**

*scripts, files*

**05 Manage the calendar.**

*schedule, follow up*

**Anthropic.  
OpenAI.**

**Google(Gemini).  
Or local. Ollama.**

*Your hardware. Your model. Your rules.*

# MY RECOMMENDATION

*Your hardware. Your model. Your rules.*

**01 Pick a workflow you do weekly.**

10 min

**02 Give it tools and a goal.**

1 hr

**03 Let it loop. Watch. Iterate.**

ongoing

THE HARD PART

**Context.**  
**Tools.**  
**Trust.**

THE PRINCIPLE

**Small agents.**  
**Sharp tools.**  
**Tight loops.**

WHAT'S NEXT

**Fewer apps.  
More agents.  
Same goals.**
